§6.7 — Iran national outage, AS44244, 2025-06-18
Routing timeline: counts of events per 15-min bucket (log-normalised).
Traffic timeline: per-anomaly z-score (sign-flipped to indicate drop).
HCAF posterior: T→R = 0.60 (strict-correct)
Routing: events per 15-min bucket, log-normalised
Traffic: per-anomaly |z|/8 (sign-flipped to indicate drop)
Anomaly intensity (normalized, see caption)
